FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition
Battery

Overview

Intro: Speaker and Intent

STA Battery

Main Body

Summary

Q&A

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition
Battery

Why pay attention to this brief?

Challenges

Opportunities

water
snow
snowstorm
wet
ice wind
camouflage
sensors
drones survival
temperatures
Elevated cold UAS
injuries
movement
thermal

I believe winter conditions present opportunities for small teams.

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition Battery

STA Battery

Mission

Primarily to locate and engage targets with organic and/or Joint fires assets in support of brigades and division level

Secondary, surveillance and recce **reporting to build situational awareness** and contribute to recognized intelligence picture

➤ Abilities needed

- Generate precise target coordinates
- Terminal guidance operations (TGO)
- To operate where the targets are and where our effectors can reach
- At all seasons, in all weather, all terrain

Artillerijeger patrols

- 6-man teams of particularly **selected** soldiers with **special equipment** and **training**
- To operate as an isolated patrols at distances and for long duration

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition
Battery

Selections

- Physically and mentally robust people
- Able to tolerate uncomfortable conditions
- Recognize their own physical situation and able to adjust their behaviour
- Motivated and volunteering to the task

Equipment

Individual

- Multi-layer principals
- High quality equipment
- **Wool**
- Skis & Pulk (personal sled)
- Reinforced bug out bag

Team

- Forward observer instrument (with thermal and laser)
- Optical spotting scope
- Radios
- Rugged Laptop
- Batteries

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition Battery

Training - General

Teach the basic skills. Then, quality time spend outside to build experience and skills needed to thrive

Focus on the details

Challenge: Balance between being humble and own belief in ability to succeed

Focus on the “The right attitude”

“No shame in turning back.”

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition Battery

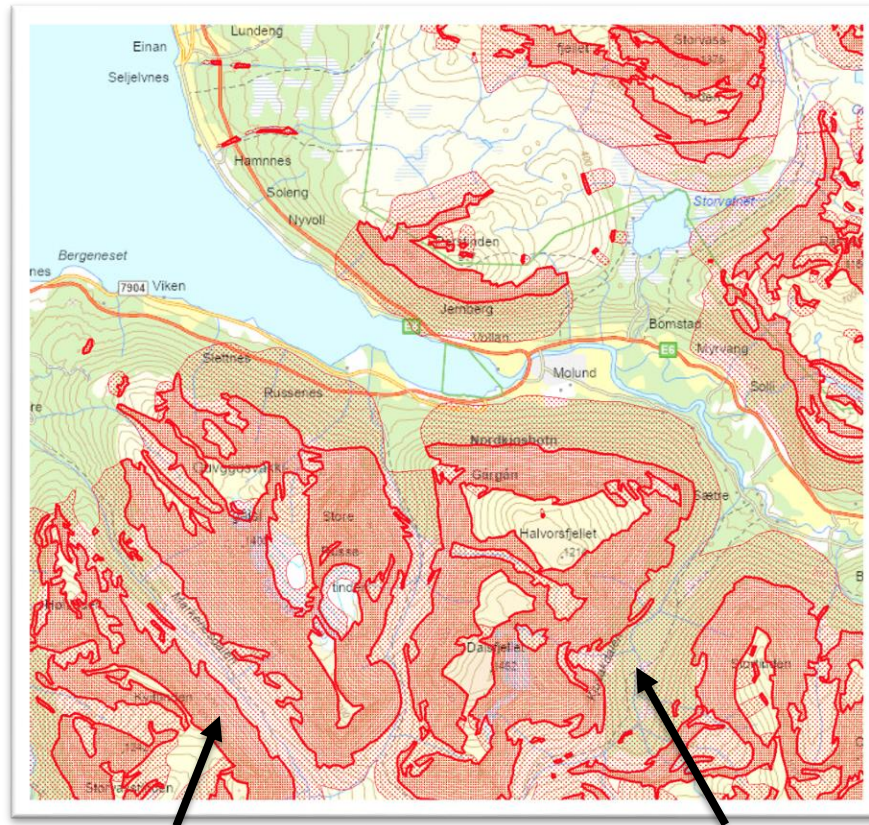

Training - Specific

Mobility!

- You need a way to move on top of the snow and you need to train it
- Understanding and avoid avalanche

Survival/Sustainment

- Water bottles need to be kept close to body to keep water from freezing
- Avoiding cold weather injuries
- Bug out bag needs to be reinforced with additional items

Release area

Discharge area

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition
Battery

Execution - OP

Dig down and use natural camouflage.

- Weather history: Prevailing wind direction and snow conditions
- Map study: Where might the wind have transported the snow

Observation hatch need to be small and reinforced with isolated to reduce thermal signature.

Routines in OP:

Computers and batteries are kept close to bodies to heat them.

Execution - Fires

Under the right conditions elevated sensors can be very powerful!

Understanding the weapons effect and how winter conditions impact.

Example: Deep snow

What to do when the target is hit?

FORSVARET

Artillery Battalion/ Surveillance and Target Acquisition
Battery

Summary

Challenges

*Opportunities &
advantages*

water
rivers food snow
snowstorm
ice wind wet
camouflage
sensors
drones survival
temperatures
Elevated cold UAS
injuries
movement
thermal

Selection, equipment and most of all training moves

Challenges to advantages

Q&A
