

NATO ENGINEER WINTER WEBINAR

*Norwegian Land Warfare Center
School of Engineers*

FORSVARET

*Ubique quo fas et gloria ducunt
- Where ever duty and honour leads us*

Agenda

- Obstacle establishment
 - Minefields
 - Axis improval
 - Survivability
 - Breaching
-
- Time: 30-45 minutes
per presentation, 15
minutes break in
between presentations.

Obstacle Establishment

*Norwegian Land Warfare Center
School of Engineers
Major Thorud*

FORSVARET

*Ubique quo fas et gloria ducunt
- Where ever duty and honour leads us*

Agenda

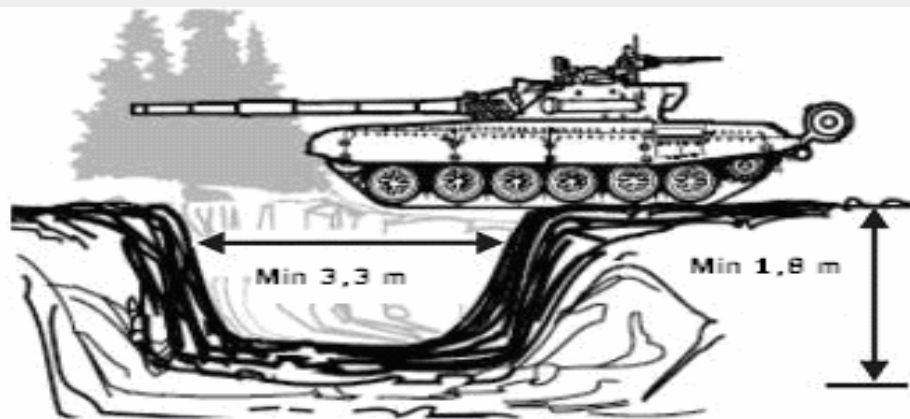

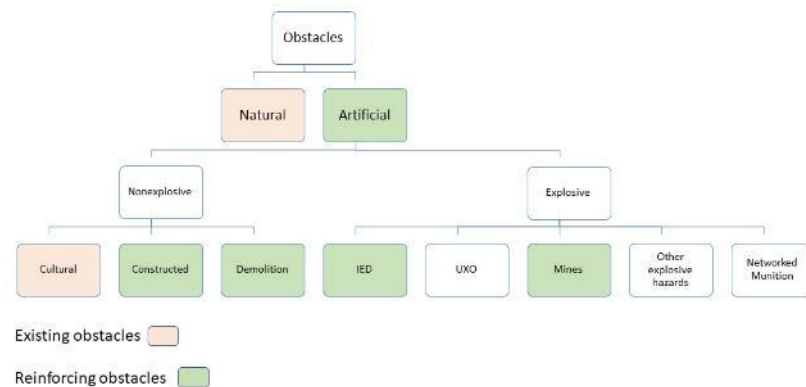

- Effectors that we rely on in arctic climate
- Details regarding establishment
- Tactical advantages in establishing obstacles in cold weather.
- Time: 30 minutes

Effectors that we rely on in arctic climate

- Mines
- Anti-tank ditches
- Berms and obstacles created out of snow in general
- Abatis and wooden obstacles
- Bridge demolitions
- Ice demolitions
- Mountainside demolitions (destruction of lines of communication).

Types of Obstacles

Details regarding establishment

- Machines and equipment need to be equipt and maintained i order to fully function in cold climate. Temperatures shifting from above, to below zero are critical.
- Areas for eqiuptment and machines needs to be marked and maintained.
- Low visibility increases the need for command and control especially regarding explosive obstacles.
- Time is of the essens, and often alot more time consuming than in warmer climate.

Tactical advantages

- Worse mobility for us means worse mobility for the enemy.
- Complexity and composition of obstacles makes breaching the obstacle more time consuming.
- Deception is easier regarding tracks, heat signatures and dummy minefields.

Key factors in establishing obstacles

- Emphasis on the terrain and weather assessment during the MDMP
 - Important to separate facts, conclusion and assumptions.
 - Make assumptions into facts
 - Plan robustly (in both time and force factor)
 - Dedicate ENG units to enhance and maintain mobility throughout the operation
- Cold weather can be a force multiplier, if exploited correctly
- Prepare the force through training and education on all leveles.

Orientation ends Questions?

(10 minutes maximum)

Ubique quo fas et gloria ducunt
-Where ever duty and honour leads us
